

## State Epidemiology Outcomes Workgroup

March 1, 2007  
9-11 a.m.  
DSAMH Rm. 314

**Members:** Ed Ho, Brenda Ahlemann, Tricia Winder, Craig PoVey, Steve Harrison, Susannah Burt, Christy Porucznik

**Members Excused:** Verne Larsen

---

### Agenda

#### **Welcome & Introductions**

#### **Review of Minutes**

**Motion:** Christy motioned to approve the minutes from 2/1/07. Susannah seconded the motion and was unanimously approved.

#### **Review of Epi Profile due 03-15-2007**

- ◆ Christy received school data from Verne
- ◆ She's not sure if we should use it at the state level because the definition "incident" differs among districts
- ◆ Additions to the Epi Profile
  - New outcome created - What percent of all incidents were referred to law enforcement?
  - Attributability to alcohol with falls average age is 70 – not useful
  - Attributability to alcohol with drowning average age is 24 – useful
  - Household health survey data will be used
- ◆ ER data will not be use in the Profile
- ◆ Christy will send the report to Craig, Susannah, Ed, Steve, Brenda, and Tricia for review
- ◆ Discussion
  - Add section at the end of the report called "Work in Progress"
  - Craig relayed the Verne is looking for ways to make his data more useful
  - Christy/ Ed present at SDFS Coordinators meeting about data collection and usefulness of data.
  - Highest rate of expulsion for high school students was for marijuana
  - Energy drinks, over the counter stimulants and caffeine are all emerging issues that need attention.

**Review of SEOW/SPF Meeting in Heber City**

- ◆ Prevention Coordinators have a better understanding of SPF process

**Overall Goal of SPF & SEOW relationship**

- ◆ The SEOW will continue to work on the data and the “works in progress” data table

**Next SEOW Meeting: Thursday, April 5, 2007, 9-11am  
DSAMH Rm. 314**
